Art Unit: 3634

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by German patent to Sesselmann (19847080). Sesselmann discloses a window glass(1), a sliding member, a cable (5), a motor (10), and a sensor (20) for detecting the force of the cable due to a trapping of an object which then stops/reverses the direction of the window from a closing position.

Claims 5-19 are allowable.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. patents to Deakin, Sasaki et al., Nishigaya, Klippert, and Berg disclose elements similar to that of the applicants invention.
